

BRaille SIGNAGE

Improve Accessibility with Braille Signs

INPS CAN MAKE YOUR BUILDING ACCESSIBLE ANYWHERE IN NORTH AMERICA

In Canada, INPS utilizes the CSA Group (Canadian Standards Association) Accessible Design For the Built Environment document revised March 2020. In the USA, INPS utilizes the ADA Accessibility Guidelines for Buildings / Facilities and Transportation.

Accessibility Signs are important to remove barriers in society. Many people rely on Braille and Tactile accessible sign systems.

FLOOR DIRECTIONAL

INPS OFFERS MANY TYPES OF BRaille SIGN SYSTEMS INCLUDING:

ADA Method Engraving

Embossed Polycarbonate Lexan

Photopolymer Architectural Braille

OUR BRaille SIGNAGE ENSURES THE FOLLOWING AODA REQUIREMENTS:

- Colour coding
- Symbols / Pictograms
- Large print
- Easy to Read Fonts

ACCESSIBILITY ACT

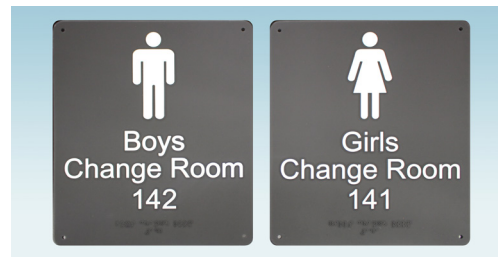

The intention of the Accessibility Act is to develop a clearly articulated set of accessible standards that will provide clarity for organizations aiming to improve information and communications, as well as barrier removal.

Improve Accessibility with Braille Signs
