INPS is a global supplier of Commercial and Industrial products as well as a proud supplier to the Defense and Military manufacturers. As a proven supplier of a vast array of parts and components, we provide innovative solutions to unique designs and concepts. Our products have been installed or applied to armoured vehicles, aircraft, transit, trailers, dunnage, warehouses, depots and offices.

At INPS we believe in partnering with the OEM or establishing a mutual relationship with our customers to support designs from concept to product maturity. Through a collaborative effort our diversified support staff will investigate solutions to fit most requirements.

INPS is certified to ISO 9001:2015, registered with the Canadian Controlled Goods Program, System for Award Management (SAM) and is approved through the Joint Certification Program.
