Design. Print. Done.

Create traffic signs with the ease of digital printing.
3M™ Digital Printing Solutions give you quick,
on-demand prints for custom and traffic signs
backed by our finest 3M™ MCS™ Warranty.
Featuring the EFI® H1625-RS Printer.

Guaranteed Performance

Durable 3M sheetings, inks, and protective overlays have been designed and tested with the EFI® H1625-RS printer to help you deliver signs with long-lasting quality and performance. Finished products using these components are protected by our premier 3M™ MCS™ Warranty for Traffic. Our finest warranty means confidence and security for you and your customers.

Improve Workflow

Create regulated traffic and custom colour signs simultaneously with 6 colour printing on the EFI® H1625-RS Printer. Roll-to-roll production with speeds up to 200 ft²/hr and instant curing 3M inks reduce the need for finished sign and material inventories. Quicker printing keeps large production runs and labour at a minimum, so your bottom line can thrive.

A Cleaner Solution

Digital printing provides a cleaner solution to screen printing. Rather than producing signs that are still wet, 3M instant curing inks are ready to touch immediately. This helps to keep the print shop and workers free of messy inks.

A Strong Partnership

To help ensure that you get only the most reliable products, 3M partners with EFI®, one of the foremost printer brands in the industry. Our partner sells, installs and supports printers worldwide, so you have the service you need to complement your guaranteed 3M Digital Printing Solution.

Experience You Can Trust

Over 75 years of industry leading science and 10+ years of proven digital printing experience mean reliable results. 3M continues our history of innovation by making one of the industry's finest guarantees available for the digital printing of custom and traffic signs.

Expand your opportunities for reflective sign applications beyond the traditional regulated traffic market.

“ The performance matched what we have been accustomed to over the years from the 3M products. I’m telling you they looked gorgeous. Wow!”
– Bill Korman, President of Korman Signs

“ It’s very easy and simple to do and clean. I don’t come home at the end of the day and have ink from head to toe, all over me...It’s just a joy to be able to digitally print over silkscreen printing.”
– Larry Goodman, Korman Signs
