S&C Rail Solutions

International Name Plate Supplies

INPS Transit is the leading supplier, designer and manufacturer of interior and exterior components for transit vehicles. Through our Natsco organization we benefit from virtually unlimited access to a complete repertoire of products, which helps streamline the OEM/end-user relationship.

We offer a full catalogue of existing transit components. Services include: custom component design, engineering and manufacturing. We also offer sample reengineering as well as component retrofit and Installation services. INPS transit acts as a one-stop shop for any solution related to transit vehicle componentry.

Through our limitless in-house and external capabilities and processes, we take all aspects of your project from the drawing board to the transit car.

Quality Assurance

At International Name Plate Supplies Ltd., we are dedicated to providing defect-free world-class products and services at competitive prices. We accomplish this through personal contributions, teamwork, and continuous improvement.

In order to meet our objectives, a management system that satisfies the requirements of ISO 9001:2015 is maintained. We have appointed a management representative with the authority and responsibility to ensure continued compliance. Regular audits by internal, independent personnel and our customers' satisfaction are used as confirmation.

INPS has the responsibility to produce quality products and services, which meet or exceed our customer's requirements.

INPS understands that all documents and products are sensitive in nature and we place a high regard on our confidentiality agreement with our clients.

INTERIOR & EXTERIOR SOLUTIONS

INTERIOR & EXTERIOR SOLUTIONS

INTERIOR & EXTERIOR SOLUTIONS

3M™ SCOTCHGARD MULTI-LAYER PROTECTIVE FILM 1004

Peel Away Graffiti One Sheet One Sheet at a Time with Scotchgard™ Multi-layer Protective Film 1004

Four separate layers of optically transparent, pressure-sensitive polyester film tape designed to protect surfaces from intentional and unintentional damage caused by scratching, etching, abrasion and graffiti. A damaged film layer can be quickly and easily removed, exposing a fresh protective sheet.

Can be used on:

- Glass and mirror
- Flat metal surfaces
- Interior and exterior applications
- Other exterior and interior flat surfaces

CEILING PANELS

Savings that hit the ceiling

We manufacture and supply the following ceiling-related transit products:

- Ceiling panels
- Speaker panels
- Transition trims
- Ceiling wraps
- Access doors

Our ceiling panels are offered in HPL, FRP and thermoformed varieties, for new-build and restoration applications. All ceiling products may be color-matched to existing components or to the client's desired color palette. Custom textures or treated laminate may be applied to our ceiling panels in order to achieve a specific look.

COVID PRODUCTS

- Your source for products to promote physical distancing and mitigate crowding
 - Door wraps and decals
 - Floor decals and signage
 - Polycarbonate barriers
 - Seat signs
 - Antimicrobial Film
 - Face Shields

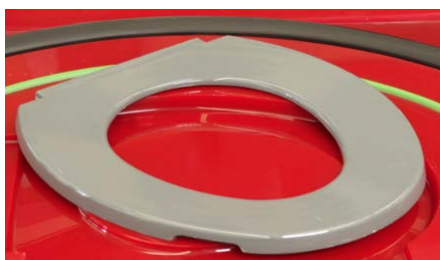

DOORS

Open up the door to our efficient solutions

We manufacture and supply the following door-related products:

- Door skins (for restyling or restoring existing doors)
- 3M™ DI-NOG™ Architectural Finishes
- Stainless Steel Panels
- Door Assemblies
- Door Nose Seals
- Door Brush Seals

FIBERGLASS SOLUTIONS

We are your fiberglass solution for mass transit

INPS services you with the problem solving capabilities that you deserve. We are continuously developing innovative and maintenance friendly solutions for mass transit including:

- Interior fiberglass panels
- Fiberglass ceiling panels
- Window freezes
- Arc shields
- Toilet seats
- Masks

With onsite engineering, INPS can build from the ground up fiberglass reinforced plastic (FRP) solutions for any transit project. From a CAD drawing, INPS designs a mold and makes a part from start to finish.

Fiberglass has the least expansion and contraction with heat, cold and/or stress.

FLOORING

Quality that starts beneath your feet

We manufacture and supply the following floor-related transit products:

- Glow-in-the-dark safety components
- Emergency exit path markings (exceeds all APTA regulations)
- LED-charged emergency exit path markings
- Complete marking kits for all flooring types
- Transition trims for all flooring types
- Extruded floor mouldings

Our flooring products are manufactured using the highest quality materials in terms of durability and safety. They are suitable for new or existing rubber and carpet floor coverings, and are available in custom colours and textures (including colour matching to existing interiors).

FRANGIBLE PANELS & METAL FABRICATION

Frangible Panels

- Break away panels
- For emergency tool box, alarms, brakes and door openings

Metal Fabrication

- Interior and exterior panels
- Cut out panels
- Air grill covers
- Skirt covers
- Door skins

GRAPHICS - EXTERIOR PASSENGER CAR

Exterior Passenger Car Graphics

Our passenger car graphics and wraps are available in virtually any dimension, texture and colour (including colour-matching to existing surfaces).

INPS manufactures high quality, reflective exterior graphics; from full vehicle wraps to safety decals and name plates.

Custom exterior passenger car graphics including:

- Logos & markings
- Anti-graffiti coatings
- Complete exterior vehicle wraps
- Custom decals
- Paint stencils
- Color matching

GRAPHICS – INTERIOR

INTERIOR GRAPHICS

INPS is the leading manufacturer of Interior graphics for rail cars. INPS offers a large range of custom interior components for the International rail vehicle industry.

- Braille and raised letter plates
- Braille signage
- Passenger car labels
- Passenger safety pamphlets for train cars
- Laser etched labels
- Locomotive control panels
- Advertising frames
- Instructional and safety signage for new or refurbished railcars.

HPPL – HIGH PERFORMANCE PHOTOLUMINESCENT DECALS

High Performance Photoluminescent decals not only comply with the latest industry standards, but have set the bar in HPPL decals. The end result is a durable and easy to clean decal which meet or exceed APTA and FRA regulations providing clear and concise directions in the case of an emergency. If it is signage you are looking for, you won't be disappointment with our polycarbonate embossed braille signage with 3M adhesive.

All our HPPL Products:

- Meet Standard Fire, Smoke & Toxicity Transit requirements
- High Impact Resistance
- Chemical and Stain resistant
- No Radioactive material used in the manufacture of this product.

WE manufacture ISO Graphics and International Symbol Signage and Decals.

INSTALLATIONS MOBILE

With you through every step of the process

We back up our products with all-inclusive installation services performed by our 3M-certified professionals. Our travel crew of graphics installers and other specialized personnel will move its equipment to your location, anywhere in North America.

Our installation capabilities include, but are not limited to:

- Graphic removal and application
- Locomotive component installations
- Sound dampening quiet cab installation and interior installations
- A/C installations and APU installations
- Reflective tape application
- Window fitting
- Locomotive wrapping

LIGHTING

Quality that starts beneath your feet

We manufacture and supply the following floor-related transit products:

- Glow-in-the-dark safety components
- Emergency exit path markings (exceeds all APTA regulations)
- LED-charged emergency exit path markings
- Complete marking kits for all flooring types
- Transition trims for all flooring types
- Extruded floor mouldings

Our flooring products are manufactured using the highest quality materials in terms of durability and safety. They are suitable for new or existing rubber and carpet floor coverings, and are available in custom colours and textures (including colour matching to existing interiors).

LLEPM (LOW-LOCATION EXIT PATH MARKING)

INPS has worked closely with many mass transit car builders and transit authorities to design, engineer and manufacture luminous egress systems that work both functionally and financially. Our LLEPM (low-location exit path marking) products are manufactured using the highest quality materials in terms of durability and safety. They are suitable for new or existing rubber, carpet floor coverings and walls.

LLEPM is mandatory on all passenger rolling stock related by the Federal Railroad Administration (FRA) and has become mandatory on all equipment operating under the self-regulating guidelines of American Public Transportation Association (APTA). It is part of the Emergency Preparedness Plans of each transit agency. To minimize cost and increase ease of installation, INPS has developed turnkey solutions that include egress signage and low-level emergency path illumination products.

METAL FABRICATION

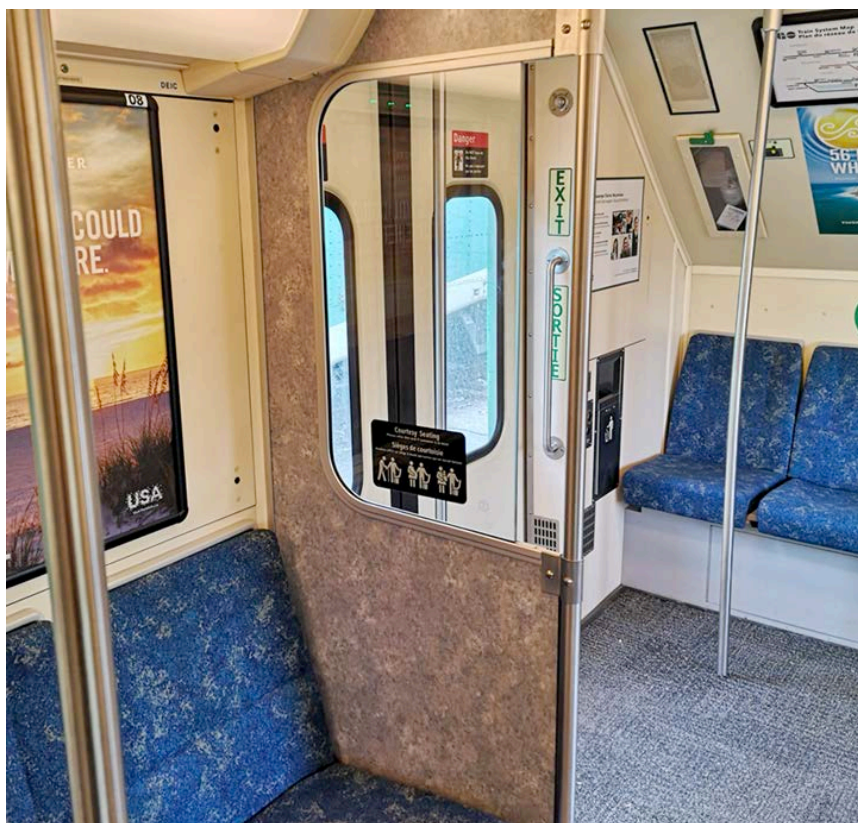

You name it, we make it

We fabricate the following metal transit components:

- Air grills
- Poster frames
- Metal Nameplates
- Custom componentry
- Faceplates and Overlays

INPS is capable of fabricating virtually any metal transit component, whether from blueprints or physical samples. Our in-house 3D scanner allows us to re-engineer any component from existing pieces (eliminating sole-source parts). We work with stainless steel, aluminum and more, producing everything from light decorative pieces to heavy-gauge exterior transit car parts. Tell us your specific need – we will create a solution.

PARTITIONS

Versatility that separates us from the rest

We manufacture and supply the following partition-related transit products:

- Wind screens
- Courtesy panels
- Partition glass
- Partition panels (in all substrates)
- Partition trims

Our partition components are useful for providing privacy and visual separation between the various sections of a transit car. The panels are available in a very large variety of substrates, and may be color-matched to existing interiors and to the client's desired color palette. We custom build our partitions to your transit car's exact dimensions and shape.

POLYCARBONATE BARRIERS

Our polycarbonate barriers allow passengers to sit closer together safely and are designed to prevent transference of particles emanating from talking, coughing or sneezing.

Working with our partners in the industry, INPS developed our polycarbonate barriers considering the following variables:

- Type of vehicle (trains and buses)
- Seating configurations (quad style seating, facing seats, row seats)
- Space between the seats
- Design of the seats
- Safety regulations – flammability, strength and durability
- Designed for temporary use – minimally intrusive, leaving little evidence upon removal

SEATING

Put us in the driver's seat

We manufacture and supply the following seat-related transit products:

- Seat shrouds
- Vacuum Formed or Fiberglass Covers
- Between-seat fillers
- Seat trim

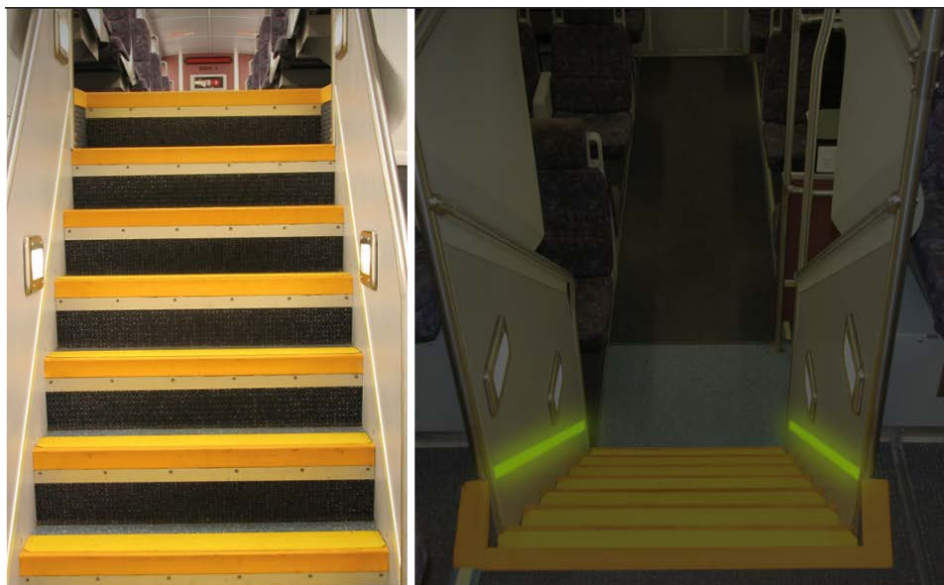

INPS offers thermoformed and FRP seat covers, including seat shrouds, between seat fillers, and brochure holders. Our seating components are fully customizable in terms of dimensions, texture and color. Choose from an unlimited number of looks to match the interior of existing transit cars or to complete new-build projects. We provide everything from low-volume replacement components to full-scale bulk orders. All components meet FST requirements.

SOUND DAMPING PANELS

Drown out the noise

Our Quiet Ride sound damping system reduces noise and vibration inside the cabin environment, making work more pleasant for your employees. This multi-layered panel system can be easily installed inside the locomotive by your staff or our team of professionals. Quiet Ride cleans up the look of the cabin interior and is custom-made to fit all locomotive models.

STAIR MARKERS

Stepping it up in terms of safety

We manufacture and supply the following stair-related products:

- Stair nosings
- Stair treads and anti-skid coverings
- HPPL products
- Formed fiberglass stairs

These products may be manufactured in custom textures and colors (including precise color matching). Photoluminescent (glow-in-the-dark) options are also available. According to our customer's needs, we are capable of retrofitting/reengineering stairs or designing new pieces from the ground up.

VACUUM FORMED PANELS

Thermoformed (Vacuum Formed) and High Pressure Laminate (HPL) Panels

INPS thermoforms (vacuum forms) wall panels, window panels and stairwell panels for bi-level train interiors. INPS also manufactures high pressure laminates (HPL) for transit car ceilings and walls.

Did you know that the configuration of one window freeze fits many generations of bi-level trains? INPS is able to accommodate all types by forming these window and wall panels into custom colours.

Yes, these products may be manufactured in custom textures and colours (including precise colour matching). We manufacture our wall panels according to your measurements and exacting specifications, with all cut-outs and future add-ons in mind.

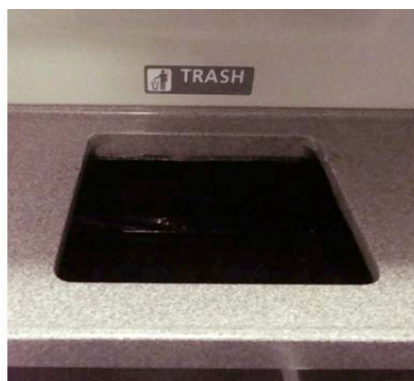

WALLS

We are your wall-to-wall solution for any transit car

We manufacture and supply the following wall-related products:

- Thermoformed and FRP wall panel
- Window freezes
- Wall panels
- Speaker grills
- Transition trims

These products may be manufactured in custom textures and colors (including precise color matching). We manufacture our wall panels according to your measurements and exacting specifications, with all cut-outs and future add-ons in mind. Use them to overhaul damaged interiors or create an eye-catching look that your ridership will enjoy.

WASHROOM MODULES

Don't flush away your time on unmatched components

We manufacture and supply the following washroom-related products:

- FRP Sinks
- Toilet Seats
- Toilet Shrouds
- Washroom signage
- Wall panels

These products are available in custom textures and colours (including precise colour matching). We are also capable of retrofitting and reengineering washroom componentry in existing transit vehicles, as well as designing new pieces according to the customer's requirements.

WINDOWS

Your window for opportunity in the transit industry

We supply the following window-related products:

- Window freezes
- Protective coatings (including anti-graffiti and scratch-resistant)
- Custom tints
- UV laminates

Practical and visual add-ons, such as anti-graffiti coatings and light-reducing tints, are available through our partner suppliers and applied to your custom design. Our window products may be installed in new-build transit cars or as replacement pieces for damaged or outdated windows.

WINDOW PROTECTION FILM

Anti-graffiti

Protects window from scratches, shattering and graffiti

Vandalism Protection: Scratch-resistant glass and anti-vandalism film can reduce damage from vandalism.

Visual Comfort: Solar control glass (tinted or low-emissivity) cuts glare and reduces visual fatigue for both drivers and passengers.

Heated glass keeps windows from fogging or frosting up.

INPS TRANSIT Solutions

A DIVISION OF INPS GROUP

We've designed, manufactured and installed railroad, transit and graphic products for over 50 years. INPS, your total transit solution.
